

The Australian Register of Homœopaths Ltd

ACCREDITATION CHECKLIST FOR COURSE PROVIDERS: To be completed and returned

Name of the Institute: _____

Name of the University: _____

Dean of the institute: _____

Correspondence address: _____

Email address: _____

Telephone: _____

Date of submission: _____

CORE SUBJECT:	CONTENT	DELIVERY MODE (Face to Face/Online)	HOURS OF TEACHING	Your Subject Code / unit code	EVIDENCE DOCUMENT PROVIDED	Assessment Type
Homœopathic principles & philosophy	Law of Similars					
	Single dose					
	Minimum dose					
	Single medicine					
	Totality of symptoms					
	Individualisation					
	Dynamis					
	Vital force					

	Primary and secondary action					
	Exciting and maintaining cause of disease					
	Aggravation					
	Susceptibility and Sensitivity					
	Suppression					
	Hering's direction of cure					
	Organon (5 th & 6 th edition)					
CORE SUBJECT:	CONTENT	DELIVERY MODE (Face to Face/Online)	HOURS OF TEACHING	Your Subject Code / unit code	EVIDENCE DOCUMENT PROVIDED	Assessment Type
Homœopathic materia medica	Sources of materia medica, provings					
	Psychological, physiological and general symptoms of polycrests					
	Psychological, physiological and general symptoms of homeopathic medicines, including nosodes, sarcodes and imponderables					
	Clinical indications and keynotes of homœopathic medicines commonly					

	prescribed in special situations: first aid, injuries, acute infectious diseases, pregnancy, lactation, geriatrics					
Homœopathic prescribing principles	Disease classification in homœopathy					
	Acute prescriptions					
	Totality, keynote, PQRS, Aetiology, Essence, Sensation, Core delusion					
	Organopathics, Tautopathy, Isopathy					
	Genus epidemicus					
CORE SUBJECT	CONTENT	DELIVERY MODE (Face to Face/Online)	HOURS OF TEACHING	Your Subject Code / unit code	EVIDENCE DOCUMENT PROVIDED	Assessment Type
Homœopathic prescribing principles (Contd.)	Idiosyncrasy and Indisposition					
	Local and One-sided diseases and their management.					
	Repertory study including electronic version					
History of homœopathy	Paracelsus, vitalism, homœopathy					
	Hahnemann through to present day					
	Stalwarts of Homœopathy					
	Scope and limitations of Homœopathy					
	Different modes of treatment: Antipathy,					

	Allopathy					
	Different traditional systems of medicine					
Homœopathic case management principles	Case taking					
	Case evaluation: diagnosis, homœopathic prognosis					
	Potency selection and administration principles					
	Relationship between homœopathic medicines					
	Interaction between homœopathic medicines and drugs, herbs and other modalities					
	Obstacles to cure					
	Diet and Ancillary mode of treatment					
CORE SUBJECT	CONTENT	DELIVERY MODE (Face to Face/Online)	HOURS OF TEACHING	Your Subject Code / unit code	EVIDENCE DOCUMENT PROVIDED	Assessment Type
Homœopathic case management principles (Contd.)	Pathology and Homœopathic Prognosis					
	Scope and limitations of Homœopathy					
	Evaluation of subsequent prescriptions					
Homœopathic pharmacology	Provings and relationship to drug clinical trials					
	Pharmacopeia, manufacture and dispensing of X, C and Q scales					
	Drug Proving (human pathogenetic trials) and relation to homœopathic potencies					

Homœopathic miasms – history & application of principles of chronic disease treatment	History of miasms					
	Primary and secondary symptoms of miasms as per Hahnemann's Chronic Diseases					
	Concept of miasms according to Hahnemann, Kent, modern and post-modern homœopaths					
	Application of miasms, nosodes, sarcodes in practice.					
Homœopathic research	Levels of research					
	Difference in paradigms between conventional research and homœopathic research					
CORE SUBJECT	CONTENT	DELIVERY MODE (Face to Face/Online)	HOURS OF TEACHING	Your Subject Code / unit code	EVIDENCE DOCUMENT PROVIDED	Assessment Type
Homœopathic research	Recent advances in the fields of ultradilutions and nanopharmacy in relation to homœopathy					
	Academic writing and critical enquiry and analysis skills					
	Study of Randomised Controlled Trials in homœopathy					
	Importance of records and record keeping					

NON-HOMŒOPATHIC COMPONENTS

CORE SUBJECT	CONTENT	DELIVERY MODE (Face to Face/Online)	HOURS OF TEACHING	Your Subject Code / unit code	EVIDENCE DOCUMENT PROVIDED	Assessment Type
Human Biology (Anatomy & physiology)	Cell structure and function, metabolism					
	Tissues, organs and organ-systems					
	Homeostasis					
	Anatomy & physiology of all human organ systems					
	Degeneration and Regeneration					
Biochemistry	Atoms, molecules, compounds, bonding types, solubility					
	Oxidation and reduction, anti-oxidants					
CORE SUBJECT	CONTENT	DELIVERY MODE (Face to Face/Online)	HOURS OF TEACHING	Your Subject Code / unit code	EVIDENCE DOCUMENT PROVIDED	Assessment Type
Biochemistry (Contd.)	Organic chemistry					
	Functional groups, structure and role of carbohydrates, proteins and lipids					
	Enzymes, Hormones					
	Cellular metabolism, catabolic and anabolic pathways, nucleic acids and protein synthesis					
	Human nutrition					
	Vitamins					
	Xenobiotics					

Human nutrition	Detoxification					
	Deficiencies and excess					
Critical enquiry	Critical skills development					
	Research methodologies					
	Calculation of 'p' and basic statistics					
	Ethics in research					
Microbiology	Bacteria and Viruses					
	Diseases and their clinical symptomatology					
Counselling	Basics of talk-therapy					
	Counselling principles					
	Self-evaluation methods					
Psychology	Scientific study of behaviour					
	Intelligence, cause -effect relation					
	Behaviour models (Pavlov, Watson, Skinner)					
CORE SUBJECT	CONTENT	DELIVERY MODE (Face to Face/Online)	HOURS OF TEACHING	Your Subject Code / unit code	EVIDENCE DOCUMENT PROVIDED	Assessment Type
Psychology (Contd.)	dynamics of behaviour (Freud, Erikson and Neo Freudians)					
	Basic concepts (hallucinations, delusions, sensations, perception and illusion)					
	Developmental psychology					
	Psycho-somatic connection					
	Pathological changes in disease and ageing relating to body systems					
	Symptomology and					

Human Pathology	common diagnostics of diseases for all organ-systems					
	Hypersensitivity and anaphylactic reactions					
	Immunology and auto-immune disorders					
	Prognosis and referrals					
Human Pharmacology	Principles of western pharmacology					
	Pharmacodynamics, Pharmacognosy, Pharmacogenomics					
	Agonists and antagonists					
	Actions of commonly prescribed drugs and interaction with CAM, including outcome for homeopathic treatment					
CORE SUBJECT	CONTENT	DELIVERY MODE (Face to Face/Online)	HOURS OF TEACHING	Your Subject Code / unit code	EVIDENCE DOCUMENT PROVIDED	Assessment Type
Human clinical examination	Clinical skills in assessment of vital signs					
	Body systems examination to assist in diagnosis, course of treatment or referral					
	Competent first aid skills					
Clinical diagnostic tests & results interpretation	Ability to interpret common laboratory investigations					
	Establishment and running of a business					

Business skills	Operational, marketing, financial and personnel management & strategies					
	Legal and ethical practices					
	Professional development (PD), self- assessment and monitoring of skills and practice methods.					
Scope of practice; National and local laws governing practice; Advertising codes	Hazard identification, risk control, OHS practices					
	Infection control, waste disposal practices					
	National and local health laws with special awareness of homeopathic practice regulations
